

Selection of Lubrications

Lubrication of chain depends on the working environment, temperature, chain speed and so on.

1. Effecton of working environment

Open drive such as combine swather etc, Use grease to lubricate.

Closed drive such as walking tractor etc, Use oil to lubricate.

2. Effecton of temperature

Application in the temperature range of -5 to +60°C is recommended.

In winter, the thin oil is recommended; But in summer , thick oil is recommended

3. Effecton of chain speed

The lubrication method is related to chain speed see following chart,

So selecting the lubrication method can refer to the following chart.
